navyasrichode@gmail.com ◇ <https://www.linkedin.com/in/navyasrichode>

OBJECTIVE

Generative AI Engineer / Python Developer with hands-on experience in **LLMs, RAG pipelines, LangChain, AI chatbots, and data analytics**. Seeking an entry-level role to build **scalable AI solutions, intelligent automation systems, and data-driven applications** that create real business impact.

EDUCATION

Master of Computer Applications,

(Aditya College Of Engineering and Technology) - 8.4 CGPA 2023 - 2025

Bachelor Of Science (B.SC), (Sathabdi Degree College) - 7.2 CGPA 2018 - 2021

Intermediate(MPC), (Siddartha Junior College) - 8.0 CGPA 2016-2018

Secondary School Of Certification, (Z.P.H.School) - 8.8 CGPA 2015-2016

SKILLS

Generative AI : LLMs, RAG, LangChain, LangGraph, Prompt Engineering, Embeddings, Web Scraping

Programming : Python

Frameworks : Django, LangChain, LangGraph.

Databases : Oracle SQL

Web Technologies : HTML, CSS, Bootstrap

Tools : GitHub, VS Code, Jupyter

INTERNSHIPS

Data Analytics Intern – Deloitte Australia (Forage Virtual Internship) **July 2025**

- Conducted data cleaning, analysis, and interpretation to derive meaningful business insights.
- Developed analytical reports and data visualizations to support stakeholder decision-making.

Web Development Intern – Octanet Services pvt.ltd (Virtual Internship) **October 2024**

- Developed and maintained responsive web pages using HTML, CSS, and JavaScript to enhance user experience.
- Collaborated on real-time projects, implementing frontend features and ensuring smooth website functionality.
- Optimized website performance and usability by debugging issues and improving design efficiency.

PROJECTS

Personal AI Chatbot (LLM + RAG)

Technologies Used: Python, LangChain, LLMs, RAG, Web Scraping, PDF Parsing

- Developed a personal AI chatbot capable of answering queries from PDFs, web links, and plain text inputs.
- Implemented web scraping and PDF data extraction to process unstructured data.
- Integrated LLMs with RAG pipelines using LangChain to generate accurate and secure responses.

Digital Cheque Fraud Detection Using Deep Learning

Technologies Used: Python, Django, Deep Learning (CNN&ResNet50), HTML, CSS.

- Developed an intelligent system for digital cheque signature verification to detect fraudulent transactions.
- Implemented Deep Learning models(CNN&ResNet50) to accurately analyze and verify signature patterns.
- Built the backend using Python and Django , integrating the trained model for real-time verification.

CERTIFICATIONS

- Python 101 for Data Science – **IBM Cognitive Class**
- Generative AI – **Simplilearn**
